DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Desai (5,861,002). Desai discloses a surgical instrument comprising:

a bipolar electrode (250);

a handpiece (Figure 17, # 232) with means for connecting said bipolar electrode (250) to said energy source telescopic member means coupled to said bipolar electrode and said handpiece for adjusting the length (effective length by extension) of said bipolar electrode; and

smoke evacuation means (203) coupled to said bipolar electrode for removing smoke and debris produced during a medical procedure using said electrosurgery pencil and energy source; wherein said energy source is an electrosurgery unit; and further comprising means for effectuating at least one of alternate and simultaneous suction and irrigation functions (Figures 17-21 and col. 11, line 27-col.14, line 27).

Allowable Subject Matter

Claims 5-10 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Crow et al (5,662,647) disclose a monopolar electrosurgical instrument with a handpiece and with aspiration, but lacks a telescoping electrode; Sandock (5,609,573) discloses an electrosurgical suction/irrigation instrument with a sleeve that slides over the monopolar electrode to change its effective length; Fox et al. (5,273,524) disclose an electrosurgical device with a monopolar electrode and with irrigation /aspiration capability; Dorsey, III (5,505,710) discloses a telescoping surgical probe with irrigation /aspiration capability; Philpips (5,195,958) discloses a tool for laparoscopic surgery with an electrocautery electrode and with irrigation /aspiration capability; and Boudreault et al. (5,186,714) discloses a multifunctional surgical instrument with an electrocautery electrode and with irrigation /aspiration capability.
